Profile

Full Stack Software Engineer with approximately 3 years of professional experience building web applications across backend and frontend. Develops backend features with PHP and Laravel — RESTful APIs, business logic, authentication, and database-driven workflows — and builds user interfaces with React.js, Next.js, and TypeScript. Has contributed to commercial business platforms in Saudi Arabia and to international multi-region e-commerce platforms, working end to end from data layer and API integration to responsive, accessible UI.

Experience

PRISMATECS | Cairo, Egypt (Hybrid) — Nov 2025 – Present

Full Stack Software Engineer

Full-stack development of commercial web applications using PHP, Laravel, and JavaScript.

Rafed — Platform for charitable associations, Saudi Arabia

- Contributed to developing a platform that serves charitable associations across Saudi Arabia.
- Built backend features and application functionality with PHP and Laravel, including business logic, database operations, and application workflows.
- Developed and maintained application features in JavaScript, and contributed to API integrations and frontend/backend communication.
- Worked on digital services and solutions associated with the Two Holy Mosques — Al-Masjid Al-Haram (Makkah), including services related to the Holy Kaaba, and Al-Masjid An-Nabawi (Madinah).

Brassbell — Property Management System (PMS)

- Contributed to developing a Property Management System, implementing application features and backend business logic.
- Implemented data-related operations, application workflows, and frontend/backend integration.

Teckdo — Content Management System (CMS)

- Currently contributing to building a Content Management System, working on backend functionality, application structure, and core features.
- Developing and integrating features across the backend and frontend.

SCANDIWEB | Latvia (Remote) — Aug 2024 – Oct 2025

Software Engineer

Developed features for international e-commerce applications: frontend development, CMS integration, reusable components, and application functionality.

OM System / OMdigital — explore.omsystem.com

- Worked on an international multi-region, multi-language e-commerce platform supporting approximately 70 store views and 20+ languages.
- Developed reusable React.js and TypeScript components and contributed to component architecture and data-fetching workflows.
- Integrated frontend functionality with Sanity CMS, working with 55+ reusable content blocks, content structures, and image crop/hotspot functionality.
- Worked on Product Listing Pages (PLP) and Product Detail Pages (PDP).
- Improved responsive layouts, accessibility, and frontend performance.
- Developed and maintained responsive email templates across three regional websites.

Purdy's Chocolatier — purdys.com

- Developed and maintained features for an international e-commerce platform, including homepage sections, reusable components, and header/footer functionality.
- Implemented authentication features (sign-in and sign-out) and worked on customer dashboard functionality.
- Integrated frontend features with backend services and APIs, and maintained and improved existing business functionality.

MOSELEY MEDIA DEVELOPMENT (MMD) | Cairo, Egypt — May 2024 – Jul 2024

Software Engineer Intern

- Gained practical backend development experience with PHP and Symfony on web application development.
- Developed and maintained application features, working with backend business logic and database operations.
- Integrated APIs and connected application components.
- Assisted with debugging, testing, and maintaining existing functionality.

FREELANCE | Remote — Jun 2022 – Apr 2024

Software Engineer

- Built websites and web applications for different clients, managing tasks from requirements and implementation to delivery.
- Developed interactive, responsive interfaces and reusable components with React.js, JavaScript, HTML5, and CSS3.
- Integrated REST APIs and third-party services, connecting frontend applications with backend services.
- Maintained and improved existing client applications.

Technical Skills

- PHP
- Laravel
- Symfony
- RESTful API Development
- MVC Architecture
- Authentication & Authorization
- Backend Business Logic
- API Integration
- MySQL
- Database Design
- React.js
- Next.js
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap
- Sass / SCSS
- Material UI
- CSS Modules
- Responsive Web Design
- Performance Optimization
- Lazy Loading
- Code Splitting
- Reusable Component Architecture
- Accessibility (WCAG)
- Semantic HTML
- Git & GitHub
- Docker
- NPM
- Webpack
- Jira
- Agile / Scrum

Education

Bachelor of Engineering – Mechanical Power Engineering, Menoufia University — Sep 2018 – Jun 2023

Languages

Arabic: Native
English: Advanced
